Youssef Mohamed Wehba

Junior Front-End Developer | React.js Developer | JavaScript Engineer

Giza, Egypt 01115371102 yossafwahpa73@gmail.com

Professional Summary

I am a Junior Front-End Developer with strong knowledge of modern web technologies including HTML5, CSS3, JavaScript (ES6+), React.js, and responsive web design. I specialize in building scalable, interactive, and component-based web applications with focus on performance, usability, and clean architecture. I continuously improve my skills through real-world projects and hands-on development experience.

Technical Skills

HTML5 | CSS3 | JavaScript ES6+ | React.js | Tailwind CSS | Firebase | REST API | Git & GitHub | Responsive Design | Component Architecture | Debugging | Performance Optimization

Projects

Portfolio SaaS Platform

Developed a full portfolio system using React, Vite, and Tailwind CSS with Firebase-ready backend structure. Includes bilingual support (Arabic/English), dark/light mode, RTL layout, and fully responsive design. Built admin dashboard with CRUD functionality for managing content dynamically.

E-Commerce Showcase Website

Built a product display system with search functionality, product details pages, and WhatsApp order integration for real business use.

React Component System

Created reusable UI components and structured React architecture for scalable front-end applications.

Firebase Admin Dashboard

Implemented authentication and full CRUD operations using Firebase Firestore for real-time data management.

Education

Computer Science Student – Faculty of Computers and Information – Egypt

Certification

International Certified Front-End Development Program – SEF Academy

Languages

Arabic: Fluent | English: Intermediate
